

# My HSK Dictionary Instructions

Welcome to your brand new HSK Dictionary! Over the next few months, you'll be joining other Chinese learners to craft a personalized Chinese dictionary full of HSK vocabulary to help you work your way to fluency in written and spoken Chinese.

This dictionary is meant to give your brain a strong visual reference so that when you learn new Chinese characters, you will not easily forget them. The time you spend crafting your dictionary pages now will serve as a strong backbone for your Chinese learning as you move to more advanced levels.

Each page in your dictionary corresponds to an HSK vocabulary word and has several sections which help reinforce your learning. The following page gives a clear explanation for how to fill in each section.

Through learning together, we become more inspired to persevere through the challenges of our Chinese learning journeys. We encourage you to take your time and to share your pages with the Chinese learning community.

At [WrittenChinese.com](https://WrittenChinese.com), we are an open community of Chinese learners. We welcome your suggestions for improvements and are eager to hear your feedback. Drop us a line anytime at [support@writtenchinese.com](mailto:support@writtenchinese.com).

Now, let's get started!
